AGENT REPORT

May 2020

Brandon Mortorff

Greetings members,

- Attended multiple meeting with the Disney Craft Maintenance Council and the OC Building trades discussing Furloughs, Safety in the workplace, benefits etc. The Contract negotiations have been put on a month to month extension scenario and will re convene in good faith once we have been cleared to resume.
- After the April hours have been reported, we find ourselves at better than anticipated hours; seeing only a 2.28% drop from the same time frame of 2019.
- Construction work is still staying steady during the crisis and we are hopeful for this to continue.
- Service hours as stated above have been relatively good considering the pandemic closures; it seems that maintenance hours have gone down but service, equipment replacement and overhauls have increased.
- We are still seeing a greater than average out of work list, but it has reduced some in the month of April and early May.
- San Dimas Construction is still in progress, I am happy to report the new Rooftop Units have been successfully craned onto the new roof. We are still expecting an opening in mid to late September.
- The Training Center has resumed the semester via Zoom Meetings and Blackboard. It may not be what everyone prefers but due to the circumstances it will suffice. Due to this change though, our Instructors have had to spend a lot of time putting there class in an online platform, so please thank them when you speak to them.
- The Trust Fund is keeping a close eye on all entities in hopes of keeping the benefits in the best possible shape. We have received good reports from our plan professionals, discovering that we have done better in Stocks and Bonds than a great majority of the nation.
- Please continue the effort to stay safe in these trying times of 2020, which is turning out to be a year everyone will remember.
- Please email, text or call me with any questions or concerns.

God Bless and Stay Safe Brothers and Sisters,

Brandon Mortorff
